Boy Is Accidentally Killed By Being Caught By a Fender.

A mafety device installed by the Electric Esliway company to prevent accidents was indirectly responsible for the death of Anionio Garza, a boy who was killed into Thursday afternoon while stealing a ride on a race track car in Juares. The youth had caught the car near the monument and was sitting on the big coil springs that were stretched between the first car and the trailer. These springs are used on all cars with trailers to prevent persons from falling between the two cars.

The boy was sitting on the lower spring, holding to the upper. As the car rounded the curve near the Juares monument his foot struck some loose earth. He was thrown between the two care, his head striking the rail just in front of the front trucks of the trailer. The hop's head was crushed by the beary trucks and he was killed instantly.

It was amounted by the Jharez authorities that the taking of the declarations of the motorman and conductor would be held at 19 'clock Priday marning. This was later postponed and at the same time it was stated that the case would not be completed until Monsiny and that the two carmen would probably remain in juil mutil that time.

He says the reads are good to Deming and the direct read from Deming

However he got off on the wrong road leaving Demining and instead of going three miles north and then to Columbus he drove 12 miles north and get into the sloughs where he was forced to attach mud chains to get through.
